

Aquatic

Porous rubber surfacing for splash parks and pool

playtop®

SAFER SURFACING

Performance Characteristics

Performance Characteristics Playtop Aquatic, specifically designed for spray parks and pool surrounds features unique anti slip properties, provides comfortable cushioning for its barefoot users of all ages and can, due to great variety of colour options, integrate itself visually into any existing design and environment.

Alongside performance testing, Playtop Aquatic has also been tested for hydrolysis and resistance both fresh water, sea water and chlorinated pool water.

Playtop Aquatic has been developed using only high quality components and should only be installed onto new or existing concrete or tarmac.
