

Indoor

A non-porous, easy to clean safety surfacing system ideal for all kinds of indoor play areas

playtop®
SAFER SURFACING

Performance Characteristics

Playtop Indoor is a safe, high quality, non-porous and easy to clean rubber safety surface, which has been specifically designed for children's indoor playground and recreational spaces.

This low maintenance surface uses a high performance pore sealer and sealing lacquer combination to ensure excellent durability and hygiene, and is ideal for areas where quick and easy cleaning is needed, without compromising on safety.

Playtop Indoor is the perfect choice for indoor play areas, whether it's in a shopping mall, hotel, campsite or airport.
